Fusion LIVE

STEALTH CONTROL

PROFESSIONAL COMPUTER-DJ PERFORMANCE DECK

SLICK, SLEEK CONTROL. STEALTH CONTROL delivers professional DJ performance in a sleek, heavy-duty metal chassis. Whether you're working a club or remixing in the studio, STEALTH CONTROL is your fingers' best friend. You'll spend less time with your keyboard and trackpad, and more time focused on the music.

Precise Controls: STEALTH CONTROL employs the same basic configuration of our other popular control decks, such as Total Control and OMNI CONTROL. Its intuitive layout mirrors traditional "two decks and a mixer" setups, so if you play on turntables or CD players, you'll immediately feel at home on STEALTH CONTROL.

High-End Feel: All of STEALTH CONTROL's knobs, faders, and buttons feature pinpoint performance because you need professional stability. You'll feel the difference immediately with one button press, fader touch, or knob turn. STEALTH CONTROL is housed in a rugged and heavyweight metal casing. That means it's built like a tank for years of gigs, and its weight ensure that STEALTH CONTROL stays put on virtually any surface.

Software Suite Included: Just like the heft of STEALTH CONTROL, there's nothing lightweight about the included DJ software suite. You get two high-

octane programs: Native Instruments Traktor LE 3 and MixMeister Fusion Live. Traktor LE is one of the most popular double-deck DJ applications on the market. It gives you all the capabilities you need to mix with your library. MixMeister Fusion Live is a completely radical approach to creative DJ performance software. It can automatically handle many of the technical tasks such as beat matching, enabling you to focus on your musical production or your performance. STEALTH CONTROL's software suite gives you all the tools you need to keep the party going all night long.

Easy Setup: STEALTH CONTROL connects to your Mac or PC using just a single USB cable for data and power. It's plug-and-play, so you don't need to install any drivers to make the connection.

Good Lookin': Let's face it. Most DJ gear isn't all that sexy. That changes with STEALTH CONTROL. Finished in Black Slate Metallic, STEALTH CONTROL is, quite possibly, the best looking DJ deck on the planet.

FEATURES:

- Plug-and-play USB connection, requires no AC adapter
- Heavy, professional feel for high-energy performance
- Rugged, firm, rubberized knobs
